To 'V', or not to 'V'? That is the question.

vocational |və(ʊ)'keɪʃ(ə)n(ə)|

adjective

relating to an occupation or employment

10 out of 10 students go to employment.

...and we all have a problem if they don't.

Education is not just about employment...

Education is not just about getting jobs! We teach kids to read and write; think; solve problems; sort and evaluate information; communicate; manage their time; work with others; participate; and become good citizens. We'll do the rest.

...but employment is *always* about education.

It comes down to:

1. Students having a sense of purpose for learning.
2. Someone caring about that learning.

To make 'pathways' a reality, we need all involved.
